

PREVENTIVE DRUG LIST

Controlling costs is important to all of us. To help manage your pharmacy costs, Independent Health has developed a list of preventive drug medications for chronic conditions which are at no cost to you. This means members can receive these important medications from day one of their plan year and no longer have to pay either the full cost of the prescription while still in the deductible phase of their coverage or the applicable tier copay.

While this benefit applies to most plans, you should check your summary of benefits for your specific plan details. You can do so by logging in to your member account using our mobile app, **MyIH**, or through our website at **independenthealth.com**.

Please note that this is not a complete listing and that the covered preventive drugs can change throughout the year. Certain examples of medications are listed below in each category.
