

PREVENTIVE DRUG LIST

Controlling costs is important to all of us. To help manage your pharmacy costs, Independent Health has developed a list of preventive drug medications for chronic conditions which are at no cost to you. This means members can receive these important medications from day one of their plan year and no longer have to pay either the full cost of the prescription while still in the deductible phase of their coverage or the applicable tier copay.

While this benefit applies to most plans, you should check your summary of benefits for your specific plan details. You can do so by logging in to your online member account using our mobile app, **MyIH**, or through our website at **independenthealth.com**.

Please note that this is not a complete listing. Certain examples of medications are listed in each category. For additional information on a particular drug, use our **Compare Rx Costs** tool by logging in to your account or call Member Services at (716) 631-8701 or 1-800-501-3439 (TTY: 711).

INDEPENDENT HEALTH PREVENTIVE DRUG EXAMPLES
